

STANTON REGENERATION MONTHLY UPDATE JULY 2009

This is the latest monthly update to be produced by us on the Stanton Regeneration site. Updates this month are:

1. The Council's website, giving information on the Stanton Regeneration Project and answering frequently asked questions, is available at www.erewashcouncil.com/stanton. Please contact us using the details at the bottom of the page, if you have comments about the website or would like other questions to be answered. The website has been updated to make it easier to find the road options map – this is now available from the home page.
2. Saint Gobain, the owner of the Stanton Regeneration site, has informed us that due to the need to demonstrate that the preferred eastern road option to the A52 can be delivered, specialist computer modelling is required. Due to the availability of these specific modelling tools, there will now be a delay in the timetable of the project. This means that the public consultation will now occur in January/February 2010 and the planning application will be submitted to us around April 2010.
3. The technical Working Groups on Transport, Housing and Social Infrastructure, Built Environment, Natural Environment and Economy are continuing to meet. There is strong officer representation from the Council on these groups to ensure that the development is in the best interests of the local community. The Groups have been set up to facilitate collaborative working and provide feedback to inform the masterplan and planning application being developed for the site. The role of the Groups is to test and challenge the masterplan so far produced, identify gaps in information and evidence and to reach consensus on issues where possible. Further details on these groups will shortly be made available on the Stanton website with the publication of the Project Plan which is now near completion.
